Thinking of you

Electrolux

# **electrolux ebony** kitchen collection

# **milan** comes to you...

**At the recent Milan Eurocucina fair, the most influential kitchen exhibition in the world, leading European manufacturers revealed a trend towards bold, black gloss appliances.**

This definite move away from ‘hiding’ appliances towards embracing each piece as a confident statement of design, saw a significant change in conventional kitchen design, resulting in kitchens of striking contrast.

The dark and seductive appliances of the Electrolux Ebony kitchen collection celebrate this emerging trend of sophisticated black gloss.

**your design statement**
The collection showcases the latest in Electrolux technology including touch electronic controls, smooth black flat panel doors and sleek frameless black exteriors, complemented with brushed steel handles.

The versatility of black allows the collection to blend seamlessly with dark wood surfaces or contrast brilliantly with colours, whites and stainless steel.

# **electrolux ebony oven –** intuition and elegance in black

Your natural affinity with style and beauty will draw your attention to the Electrolux Ebony oven. It's sleek black glass and ease of use will make it a showpiece in your kitchen.

**designed for you**
The large capacity 80 litre oven makes catering for every occasion quick and easy. There are a myriad of little ways we've thought about you. Multi-position racks increase cooking flexibility, telescopic slides to easily manage your cooking and a split grill tray designed to fit into your dishwasher.

**touch electronic controls**
The touch electronic controls offers you multi-function programmes (10), to help you turn out dishes like a professional.

**'a' class energy efficiency**
The Electrolux Ebony oven boasts an 'A' Class energy efficiency rating*, meeting the highest European energy standards.
*European standard EN50304

**catalytic liners**
Catalytic liners are designed to absorb fat given off during the cooking process, which is then vaporised by the heat of the oven – ensuring your oven is kept cleaner for longer.

# **induction cooking –** safe, precise and powerful

Induction cooking will revolutionise the way you cook. No domestic cooking system heats faster, uses less power or is more precise and safe to use than induction – not even gas!

**perfect control**
Precision perfect cooking is no longer a case of luck over good judgment. Temperatures can be reached and maintained easily. This greater precision enables you to do things like melt chocolate without it burning or to simmer special sauces without them boiling. Control is at your fingertips with induction cooking. The electromagnetic method of heat transfer utilised in induction cooking uses energy to maximum efficiency, conserving power. Unlike other cooking appliances there is virtually no pre-heating phase.

**take the heat out of the kitchen**
As there are no naked flames, the residual heat experienced with induction zones is substantially reduced, keeping the kitchen cooler and the food perfect. Naturally this means surfaces are much easier to wipe clean, as spilt food is not burnt onto the cooktop or surrounds. Additionally, if there is no pot on the induction zone, the zone will not heat up, avoiding accidents that can occur when cooktops are left on.

**how does it work?**
Induction technology uses electromagnetic fields to transfer energy to the cooking pot that then converts into heat. The heat is generated at the base of the pan, not by a cooking element. In effect, this turns the pan itself into a hotplate and removes a significant amount of radiant heat from the cooktop surface. As a result, control is instantaneous.

**suitable induction cooking utensils**
You may not need to buy new cookware to enjoy the benefits of induction cooking. The simple test to see if your pots or pans are suitable for induction is if a magnet sticks to the base of the cookware.

**control at your fingertips**
Melt chocolate and simmer sauces with confidence or reach boiling point in seconds only with induction cooking.

# **electrolux ebony induction cooktops –** induction cooking knows no boundaries

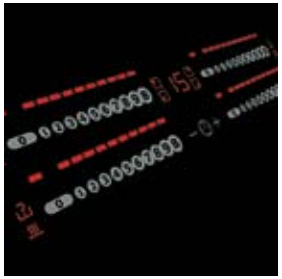
The Electrolux Ebony maxisense induction cooktop offers maximum cooking freedom and flexibility with professional results – for people who love to cook.

**ultimate flexibility with maxisense**
The maxisense induction cooktop is developed with up to four large induction zones, which detect pan presence and location and are not restricted to traditional circular zones. This allows pots of various shapes and sizes to be placed anywhere on the cooktop, provided they come into contact with the induction crosshair. Large pans or pots can even be placed across two zones.

**european style**
Both Electrolux Ebony induction cooktops are imported from Germany, finished in sleek black ceramic glass, clean bevelled edges and slide touch controls.

A small selection of cooktops is shown here. Any Electrolux induction cooktop is the perfect accompaniment to the Electrolux Ebony range. Refer to the Electrolux E:Line brochure or ask your retailer for further details.

**thoughtful design**
All zones and controls are at the front of the Electrolux Ebony induction cooktops, to eliminate the need to reach over hot pans, while making full use of cooking space.



**stylish touch & slide temperature control**
Electrolux Ebony induction cooktop surfaces feature touch slide controls to showcase the latest in innovative user technology for your kitchen. This impressive design detail enhances the sleek appearance of your cooktop, while giving you perfect temperature control. Simply slide your finger along the glass surface to change cooking temperature instantly.

**stop + go**
The simple to use Stop + Go function gives you the ability to leave the cooktop on a keep warm setting if you are called away. When you are ready to start cooking again, by pressing Stop + Go, the cooktop will return to your previous setting.

# **tetsuya wakuda** cooking authority

Ever since Tetsuya started cooking at his tiny restaurant in Sydney's Rozelle in 1989, he has been showered with accolades.

Currently, his eponymous restaurant, now based in a stunning heritage-listed house in Kent Street, Sydney, is rated in the top 20 of the world's best restaurants and the Best Australasian Restaurant in The S.Pellegrino World's 50 Best Restaurants 2009 list and has been awarded three chef's hats (the highest rating) for the 18th year running in the 2009 Sydney Morning Herald Good Food Guide.

Tetsuya's exquisitely refined cooking has long attracted devotees from around the globe; indeed, more than half of his restaurant's bookings are made from overseas. And although he travels extensively, he can still usually be found, sleeves rolled up, at the stoves in Kent Street. Tetsuya, in turn, has long been a devotee of Electrolux appliances, and his private kitchen at the restaurant is equipped with the Electrolux Ebony kitchen collection.

"I've known the company for years and I've been using Electrolux equipment ever since I started in Rozelle. In Europe it's one of the most popular brands for commercial kitchens, and for the home cook it offers the same durability, reliability and ease of cleaning needed on a large scale in restaurants.

As the kitchen is increasingly becoming the heart of home life, where you can relax with family and friends. You can see it in the way kitchen design is changing – open-plan living rooms that centre around the kitchen, where you can chat over a glass of wine while you're cooking. So although the kitchen may only be used a few times a week, it needs to be more user-friendly, ergonomic, stylish and, most importantly, easy to clean! After you've been entertaining, you don't want to spend two hours in the kitchen cleaning up!" laughs Tetsuya.

Tetsuya Wakuda of *Tetsuya's* Sydney, Australia – voted one of the world's top five restaurants by Restaurant Magazine's '2007 World's 50 best restaurants'

## tetsuya's roasted scampi
seasoned with tea and scampi oil

**the key to this dish is to just cook the scampi – once overcooked the flesh will turn mushy**

10 medium-sized scampi, halved lengthwise
salt and white pepper
1 teaspoon ceylon tea
1 tablespoon scampi oil
½ teaspoon banyuls vinegar or sherry vinegar
ogonori or wakame

**garnish**
deep-fried julienned leek
shredded nori

**preparation**
preheat oven to 260˚C (500˚F).
season the scampi with salt and white pepper to taste.
grind the tea to a powder and sprinkle on top of the scampi.
place the scampi halves on a baking tray and put in the oven for 3 minutes. as soon as the scampi feel hot to touch, they are ready. they should be just cooked and still look slightly translucent.
combine the scampi oil and vinegar.
to serve, place a little ogonori on the base of serving plates.
place the scampi halves on top, drizzle with the combined scampi oil & vinegar, and garnish with the leek and nori.

**serves 4**

# **electrolux** top service

Electrolux Top Service encompasses the after sales service including Delivery, Home Service and Spare Parts.

**delivery**
The purchase of a new appliance is an exciting experience. Electrolux customers can, for an additional charge, choose to have their new appliance delivered by our experienced staff. This service, at the customer's option, includes the removal and recycling of packaging materials and even the old appliance if necessary. Delivery is available in Adelaide, Brisbane, Melbourne, Perth and Sydney. It may not be available in some rural locations and is not available in New Zealand.

**home service**
Home Service is provided for repairs to appliances by trained technicians. For repairs to appliances that are outside the manufacturer's warranty period and not required as a result of a manufacturing defect, a service fee is payable. Home Service is available throughout Australia and New Zealand.

**spare parts**
Home Service and Spare Parts can be contacted by phone using our toll free national numbers.

**The Thoughtful Design Innovator.**

Do you remember the last time you opened a gift that made you say “Oh! How did you know? That’s exactly what I wanted!” That’s the kind of feeling that the designers at Electrolux seek to evoke in everyone who chooses or uses one of our products. We devote time, knowledge, and a great deal of thought to anticipating and creating the kind of appliances that our customers really need and want.

This kind of thoughtful care means innovating with insight. Not design for design’s sake, but design for the user’s sake. For us, thoughtful design means making appliances easier to use and tasks more enjoyable to perform, freeing our customers to experience that ultimate 21st century luxury, ease of mind. Our aim is to make this ease of mind more available to more people in more parts of their everyday lives, all over the world. So when we say we’re thinking of you, you know we mean just that.

The “Thinking of you” promise from Electrolux goes beyond meeting the needs of today’s consumers. It also means we’re committed to making appliances safe for the environment – now and for future generations.

**Electrolux. Thinking of you.**
